Relevant Experience

Chief Technology Officer @ dsociety

Nov 2021 - Present // Medan, Indonesia

dsociety is an educational startup that helps students to prepare for college entrance exams. I develop applications according to the needs specified by the product team, do testing and launch the website.

Website Developer @ quranreview

Apr 2021 - Present // Yogyakarta, Indonesia

Quranreview is a startup that aims to educate the public about the Qur'an through selling books about its reviews and holding events. I build websites, from concept brainstorming to site implementation. I also create an admin website to manage participant data, events, and book sales.

Front-End Developer @ mashara

Feb 2018 // Medan, Indonesia

As a front-end developer, I turn designs into web pages. When the website design is ready, I change it to HTML and CSS. I also make the website more interactive with vue.js.

Freelance Software Developer

Des 2017 - Present // Remote

I started my career in software development as a freelancer, either directly with clients or from my community. I had many overseas clients and i'd been done many project remotely.
